Art Unit: 3682

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a handle cover, classified in class 74, subclass 551.8.
 - II. Claims 7-11, drawn to a point of sale dispenser, classified in class 206, subclass459.1.
 - III. Claims 12-14, drawn to a retail merchandising method, classified in class 705, subclass 14.
- 2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a decorative cover. Alternatively, invention II has separate utility such as a rack. See MPEP § 806.05(d).
- 3. Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. MPEP § 806.05(e). In this case, the process as claimed can be practiced by hand. For example, one can use the hand to place the cover stacks in the dispenser receivers or to dispose the handle covers. Alternatively, the apparatus as claimed can be used to practice another and materially different process such as the process for protecting a handle of a shopping cart.
- Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. MPEP § 806.05(e). In this case, the process as claimed

can be practiced by hand. For example, one can use the hand to place the cover stacks in the dispenser receivers or to dispose the handle covers. Alternatively, the apparatus as claimed can be used to practice another and materially different process such as the process to storage the handle covers.

- 5. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. MPEP § 806.05(h). In the instant case, the product as claimed can be used in a materially different process of using that product such as the process of protecting a handle of a shopping cart.
- 6. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. MPEP § 806.05(h). In the instant case, the product as claimed can be used in a materially different process of using that product such as the process to storage the handle covers.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

for Group I is not required for Group II and/or III, restriction for examination purposes as

indicated is proper.

Because these inventions are distinct for the reasons given above and the search required 10.

for Group II is not required for Group I and/or III, restriction for examination purposes as

indicated is proper.

Because these inventions are distinct for the reasons given above and the search required 11.

for Group III is not required for Group I and/or II, restriction for examination purposes as

indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an 12.

election of the invention to be examined even though the requirement is traversed (37 CFR

1.143).

A telephone call was made to Mr. Mark E. Brown on April 6, 2005 to request an oral 13.

election to the above restriction requirement, but did not result in an election being made.
